Vision of OBE @ KITSW

OBE is an educational approach that focuses on defining specific learning outcomes or competencies that students are expected to demonstrate by the end of a course, program, or educational experience.

OBE office at KITSW has three visions:

1. To emphasize clear, measurable learning objectives that specify the knowledge, skills, and attitudes students should acquire.
2. To shift the focus of education from teaching to learning, placing students at the center of the educational process (Student-centered learning)
3. To ensure instructional methods and assessment strategies are aligned with the intended learning outcomes.

Effective implementation of OBE needs organized supervision to achieve the educational objectives of our programmes. The office of OBE ensures the following:

1. Effective functioning of the process for implementation of OBE system in our institute
2. Implementation of effective strategies for OBE
3. Assessment and evaluation framework which reinforce Teaching & Learning
4. The data from OBE is utilized to achieve continuous quality improvement to teaching-learning process and curriculum
5. Students acquire the 21st century Knowledge, Skills and Qualities (KSQ) of a professional engineer.
