A Report on Industrial Visit to Infosys, Hyderabad

The Students of B.Tech CSE VI semester students had visited INFOSYS, Special Economic Zone - Unit - 1, Ghatkesar Mandal, Medchal, Hyderabad, on April 03, 2019. The visit was a part of Industrial Visit program which conducted by TASK for the Department of Computer Science & Engineering and Department of Information Technology of Kakatiya Institute of Technology & Science, Warangal.

This program initiated mainly to connect academics with industry requirement and accelerate the learning curve to equip the students to perform well once they are ready for placements.

The visit started with a session by Ms. Prachi Swamy (Branding & Marketing), first congratulated us on being well dressed and thanked us for showing respect for the program. She then gave a brief introduction about Infosys. She narrated briefly how Infosys was born and today where it stands in industry. She gave information about Infosys governing body right from Chief Executive Officer till Chairman. Infosys is a MNC spread across 45 countries, and over 198000 of the world's best-trained IT consultants and technology services.

Mr. Sharath (Developer) explained about values of Infosys like Leading Change, Integrity, and Respect for Individual, Excellence, Learning and Sharing. He also explained about sectors in which Infosys is providing services ranging from Application Outsourcing Services, Application Development and Maintenance, Infosys Validation Solutions, Cloud Infrastructure and Security.

Mr. Wajid (Developer) explained us how to lead different sets of people once we become managers and advised us to know the grass roots level first by getting in the trenches and understanding the ground realities. He also explained us about conscious competence, and unconscious competence. The speaker advised us that one should develop sound knowledge, positive interaction skills, and good communication; working in teams, effective PPT's and reasoned decision making skills which would help us to adapt to corporate life and achieve success in our fields.

Then we were asked to go on campus tour on our own and interact with the employees who were free and know about the work culture and office environment by restricting us to some places.

Post lunch we again gathered in the same room and session was taken by Ms. Prachi Swamy and Mr. Sharath, by asking us about our interaction with the employees and our experience in the campus and we even asked some of the questions and got clarified.

On a whole Industrial Visit to Infosys was a huge success which was full of knowledge. We got to know working methodology of a MNC company, got to know how the people are working in an industrial environment and got industrial exposure on this trip.

We agreed that such kind of trips must be organized more frequently in future and students must be given industrial exposure right from III year itself so that, during course we can develop the skills required for industries more.

We enjoyed the knowledge full outing and thanked the Infosys Management for taking their precious time out in explaining us. We specially thanked Ms. Prachi Swamy and Mr. Sharath for spending their valuable time with us.
