## INDUSTRIAL TOUR

The two places which we have visited we have experienced the field work in NACL & observed the process how work is done in day to day in climate change and observes the climate and notifies the cyclone.

## NACL INDUSTRIES LIMITED

NACL formulates its formulations in a modern formulation plant situated in the East Godavari District of Andhra Pradesh. This location is situated in the scenic rice growing area on India's east coast. This unit is one of the few to have in a single location, integrated multi-line facilities capable of producing a variety of pesticide formulations such as liquids, wettable powders and granules simultaneously. This unit has the formulation technology to produce dry flowables and water based emulsions

## CYCLONE WARNING CENTER

During that period it was Dependent Meteorological Office (DMO) and it was reduced to Secondary Meteorological Office (SMO) from 1.6.1951. It was again upgraded to DMO in 1965. Cyclone Warning Centre (CWC) started its functioning from RS/RW building from 23.09.1974 with Meteorologist Grade-I as incharge. Forecasting unit was closed at airport, however current weather and surface observatory were continued. Port Meteorological Office (PMO) was commissioned in March 1972 in Fringe house near Visakhapatnam Port. Radiation unit, which was established in 1960, shifted to RS/RW building in 1980. APT unit to receive cloud imageries from satellite was started functioning from June 1977 in Andhra university campus.
