Association Hour Activity

Date of Event: 27.11.2021

Topic of The Event: Final year Students Interaction.

Speaker: Sai Anjani Kumar-B18IT037- Discussing about Career Paths (Options) after the completion of B.Tech.

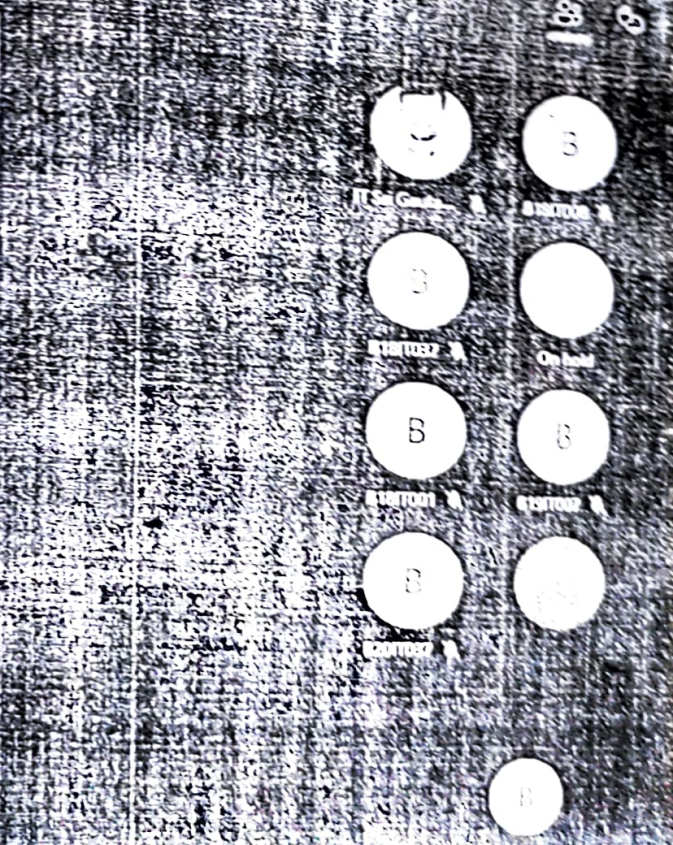

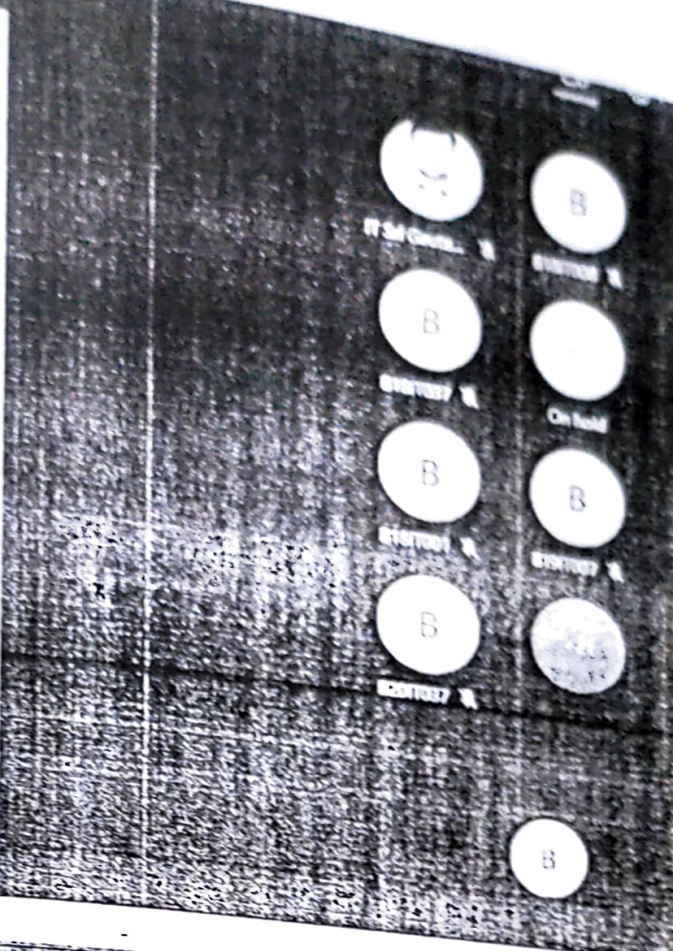

The image shows a screenshot of a Zoom meeting interface. At the top, there is a header bar with a grid of participants. From left to right, it includes a video thumbnail of a man, followed by five circular icons representing other participants. The first icon shows a cartoon character, and the others contain the letter 'B'. Below the icons are labels: 'Sai Anjani Kumar', 'B18IT037', 'B18IT037', 'B18IT037', and 'B'. The main area of the screenshot is a presentation slide with the title 'OPTIONS AFTER B.TECH' centered at the top. Below the title, there is a list of options, which is mostly illegible due to the low resolution and high contrast of the image. The bottom of the screenshot shows a portion of the Zoom control bar with various icons.

Reinforcement Learning

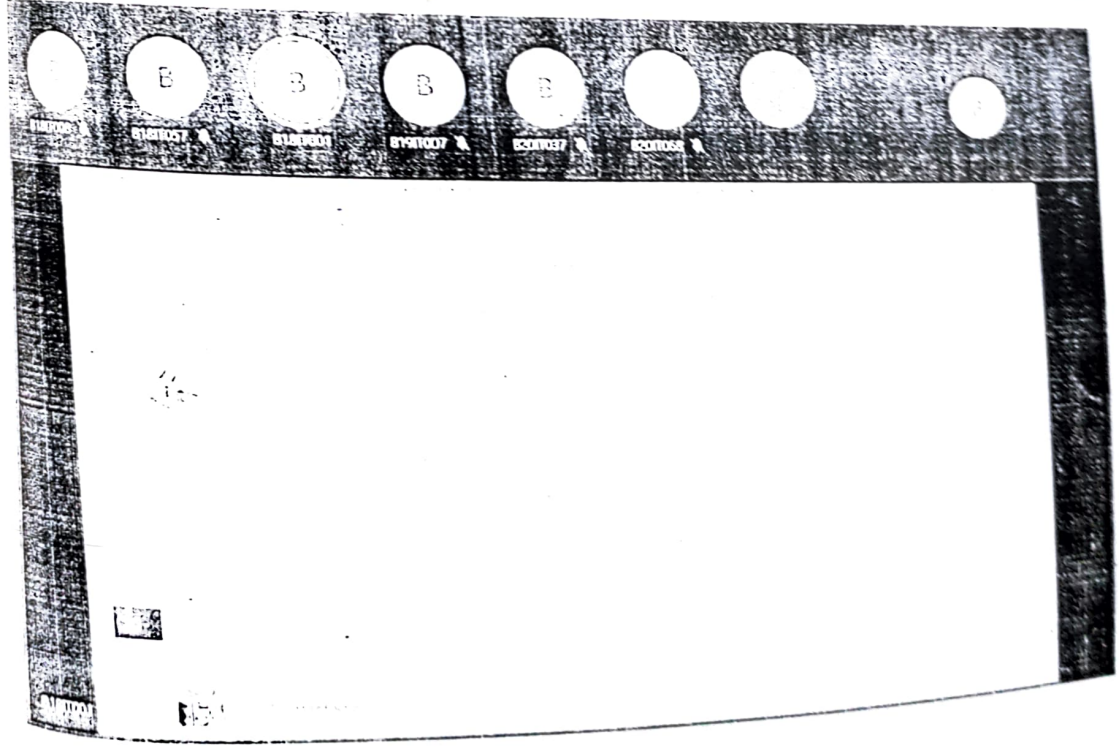

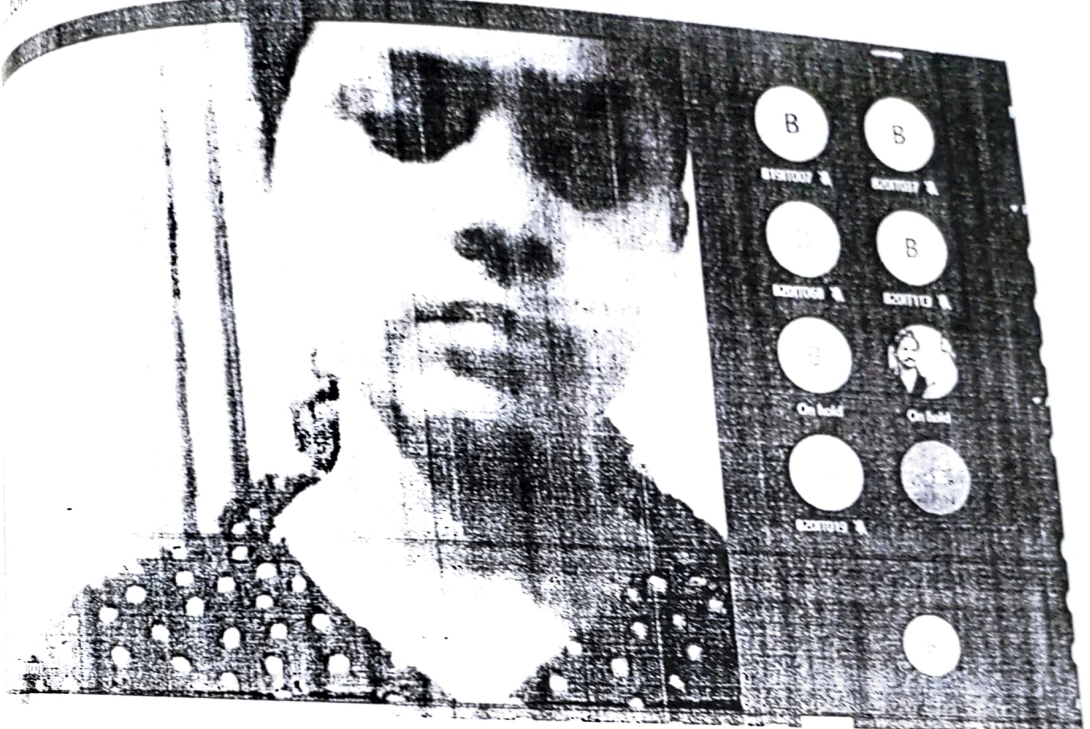

Reinforcement learning (RL) is an area of machine learning concerned with how intelligent agents ought to take actions in an environment in order to maximize the notion of cumulative reward. Reinforcement learning is one of three basic machine learning paradigms, along with supervised learning and unsupervised learning.

What is Machine Learning?

Machine learning (ML) is the study of computer algorithms that can improve automatically through experience and the use of data. It is seen as a part of artificial intelligence. Machine learning algorithms build a model based on sample data, known as training data, in order to make predictions or decisions without being explicitly programmed to do so. Machine learning algorithms are used to analyze data from various sources, such as transactional data, user feedback, and sensor data, to identify patterns and make predictions. The goal is to develop models that can automatically learn from data and improve their performance over time.
