2. ILS-I Lecture-1 Proceedings

Inauguration:

The Impact Lecture Series-I is inaugurated by Dr. P. Srikanth, Head, Center for Innovation Incubation Research & Entrepreneurship (C-I²RE), KITS Warangal and Dr. S. Sunil Pratap Reddy, Chairman, IIC, KITS Warangal in the presence of guests and audience in online mode (MS Teams). In his welcome address, Dr. S. Sunil Pratap, thanked AICTE / MIC for selecting IIC – KITSW as a host institute for Impact Lecture Series for the benefit of both faculty and students of HEIs located in the rural areas. He also thanked the guest speakers Mr. Mohammad Shairose Ahmed, Founder CEO Mhfictio, Bunkmeal for sharing his valuable time to motivate the participants on innovation and entrepreneurship.

In his address, Dr. P. Srikanth, detailed the role of C-I²RE at KITS Warangal to nurture the students towards job seekers to job givers. He also elucidated the various activities conducted and to be conducted by IIC, KITS Warangal with the support from MIC-India. He motivated the students, how these impact lectures will aid in becoming innovators and then entrepreneurs.

Lecture – 1: Session on Lean start-up & Minimum Viable Product

During his lecture, Mr. Mohammad Shairose Ahmed explained the students what is a lean startup. He also described his motivation and process behind creating BunkMeal.

He also interpreted that for a startup to become successful, you need a vision, a clarity, clarity that what you're going to do, who you're going to serve, what you want to become in the future.

He described what are the customers pains and needs & how you should address them by analyzing the needs and pains quantitatively and qualitatively.

He also explained what are MVP's (Minimum Viable Product) & MVE's (Minimum Viable Experiment) and what role do they play in your start-up.

He stressed the importance customer satisfaction and feedback and build on it which in the longer run helps you build a successful company.

He said that “Everything is an experiment. You just experiment with the customers. You just experiment with your assumptions and just deliver the product. When the vision remains clear you work the feedback received and deliver better products.”

He motivated students by saying that “When You Fail Fast, You Learn Fast.”

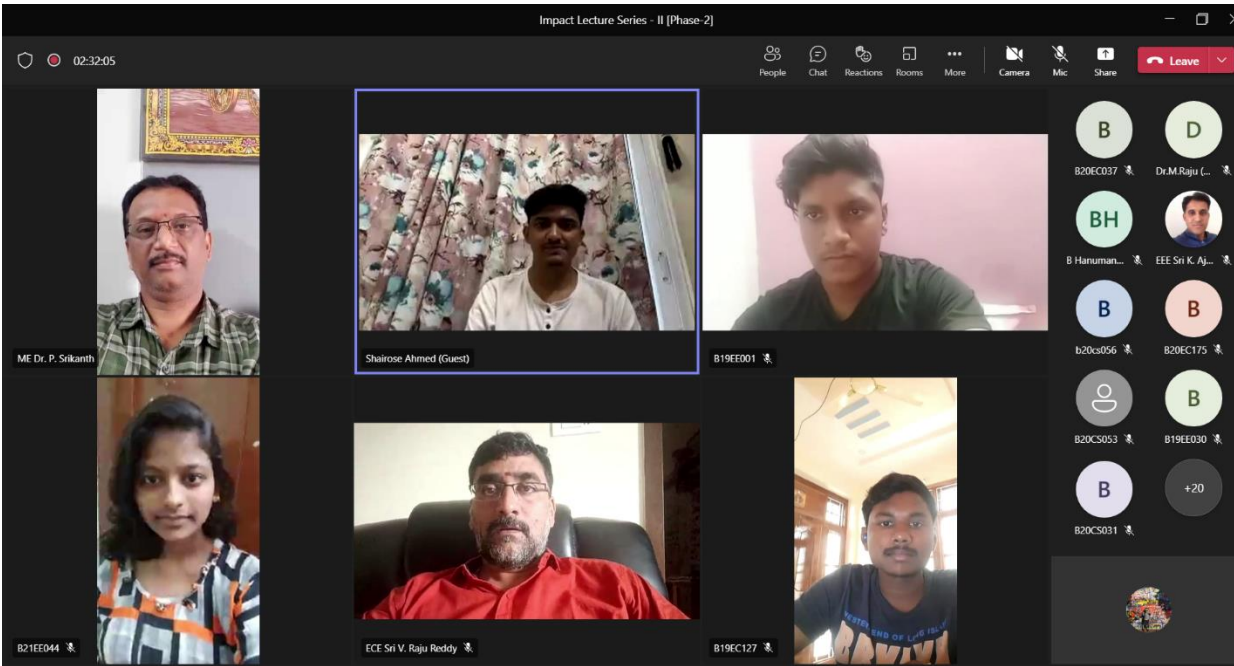

He Explained that when your assumptions do not work, you should learn from it and make new assumptions, build the product again and deliver it & this cycle should continue until your product becomes refined and acceptable to the consumer. So, it is important for anyone who wants to start a startup list out your assumptions and risks.

He also reminded that you should not stop after your product becomes successful and that you should update it continuously to current industry standards and consumer taste to make it adaptable.

He finally advised the participants to make your vision strong & clear.

He also took questions posed by the participants and clarified their doubts and concluded the session.

LEAN STARTUP & MVP

What is
LEAN STARTUP?

"Lean Startup" is an approach for launching businesses and products, that relies on **validated learning, scientific experimentation, and iterative product releases** to shorten product development cycles, measure progress, and gain valuable customer feedback.
