

DEPARTMENT OF COMPUTER SCIENCE & ENGINEERING

Sustainable Development Goals (SDG)

We are committed to sensitizing the faculty, staff & students to the United Nations SDGs.

SDG Vision:

The Department of **Computer Science and Engineering** aims to empower graduates with strong computational and engineering foundations to design innovative, intelligent, and scalable software solutions for real-world challenges in the domains of healthcare, education, smart infrastructure, sustainable industries, and environmental monitoring, leveraging data-driven, AI-enabled, and secure computing technologies to support inclusive growth and sustainable development.
