Wall art for SUMSHODHINI'22, a national level technical student symposium.

A news letter was published by Photography and Media Club for KITS MUN'23.

Best Practice:

The Photography and Media Club implements a range of best practices to ensure that club members have access to quality photography and media equipment, such as cameras, tripods, lighting kits, and editing software. Establish guidelines for equipment usage, including proper handling, storage, and maintenance to prolong their lifespan and ensure availability for all members. Organize creative challenges and projects to encourage members to explore different photography and media genres,

experiment with new techniques, and unleash their creativity. Facilitate peer mentoring and collaboration among club members of different skill levels, interests, and backgrounds.

Outcomes:

The outcomes of a Photography and Media Club can be diverse and impactful, both for individual members and the school community as a whole. Members of the club learn technical aspects such as composition, lighting, and editing techniques, as well as creative storytelling and visual communication skills. The club provides a platform for members to explore their creativity, experiment with different artistic styles and techniques, and express themselves through visual mediums. Members have opportunities to take on leadership roles, organize events, mentor peers, and collaborate on projects, fostering leadership skills, teamwork, and effective communication.
