

STUDENT - CIRCULAR

Sub: Practice Sessions on NeoPAT Platform - Reg.

Dear Students,

Most of our campus placement processes consist of two rounds. The first round typically includes **quantitative aptitude and English**, while the second round focuses on **coding**, where you will be required to write programs in a specific or any programming language.

To enhance your chances of getting placed, it is essential to **improve both of these skills** through **consistent practice**.

You have been provided access to the **NeoPAT platform**, which includes **programming and aptitude courses**. These courses are well-structured with a wide range of practice problems, organized on a **weekly basis** to facilitate systematic learning.

Table.1 Courses available on NeoPAT platform

Batch	Programming courses	Aptitude courses
IV semester students	C & Data Structures (2027_PSD_C & DS Lab_Practice Course)	Quantitative aptitude (Placement Preparation_Aptitude Practice Course)
VI semester students	Advance C & Data Structures (2026_PSD_Advanced C & DS Lab_Practice Course) Java Programming (2026_PSD_Java Lab_Practice Course)	Quantitative aptitude (Placement Preparation_Aptitude Practice Course)

Make the most of this opportunity by **practicing regularly** and strengthening your skills. Doing so will greatly improve your chances of success in **campus recruitment**.

For NeoPAT login related issues, please email to pnreddy.eee@kitsw.ac.in

Best wishes,

PRINCIPAL
